# Huang Fang

Fudan University
Department of Physics
Shanghai, China

fangh@fudan.edu.cn
Tel: +86 15000694057

## Education

2022 - 2026 Postdoctoral Researcher, Physics, Fudan University
Advisor: Prof. Peng Tan

2016 - 2022 Ph.D., Physics, Brandeis University
Advisor: Prof. W. Benjamin Rogers,
Prof. Michael F. Hagan

2012 - 2016 B.S., Optical Information Science and Technology, University of Science and Technology of China

## Research Funding

2026 China Postdoctoral Science Foundation, Special Financial Grant.
Grant No. 2026T190889; RMB 180,000.

2025 China Postdoctoral Science Foundation, General Financial Grant.
Grant No. 2025M773335; RMB 80,000.

2022 China Postdoctoral Science Foundation, General Financial Grant (Second Class).
Grant No. 2022M720811; RMB 80,000.

## Research Interests

Interfacial physics and low-dimensional assemblies, including geometrically frustrated and confined soft matter and nonequilibrium complex systems. Enhanced-sampling methods for molecular simulations and AI-assisted inverse design and optimization of programmable intelligent materials.

## Skills and Techniques

Polymer synthesis and characterization; optical, confocal, and electron microscopy; quantitative image analysis and particle tracking; molecular simulations with C++, Python, LAMMPS, and HOOMD-blue; high-performance computing and cluster management.

## Teaching Experience

PHYS 29 Teaching Assistant, **Electronic Laboratory**, Brandeis University, 2017-2018
PHYS 18 Teaching Assistant, **Introductory Laboratory**, Brandeis University, 2016-2017

# Publications
